Live, online lessons with a tutor

Users can schedule private lessons with a native speaker who will help them reach their learning goals

Reporting

Easy tracking of users' progress

Corporate customer support

Support provided by a dedicated account manager

Why is Babbel right for your business?

Babbel courses are structured to help users become more confident in a new language in a short amount of time.

Can your team make business phone calls in other languages? Or set up a meeting with colleagues or clients in another country? We offer content related to many common work situations.

With entertaining 15-minute lessons, Babbel helps everyone fit learning a language into their schedule.

Take a look at an overview of our [Business German course](#).

"In addition to the aspects of continuous learning, our young and international team also puts emphasis on having fun. Our employees like to learn with Babbel and very much appreciate the offer – same as our passengers, by the way."

Daniel Krauss, Founder and CIO of Flixbus
